

Dawlish Warren Winter Wildlife

Dark-Bellied Brent Goose

Having a pit stop to feed from Siberia!

Cormorant

A larger and more conspicuous, almost dinosaur looking species!

Avocet

A pied bird with a distinct up-curved bill.

Oystercatcher

Despite the name, they feed on cockles and mussels also.

Curlew

The UK's largest wading bird, known for its recognisable call.

Kingfisher

A tropical-looking species that swoops into moving water to catch fish.

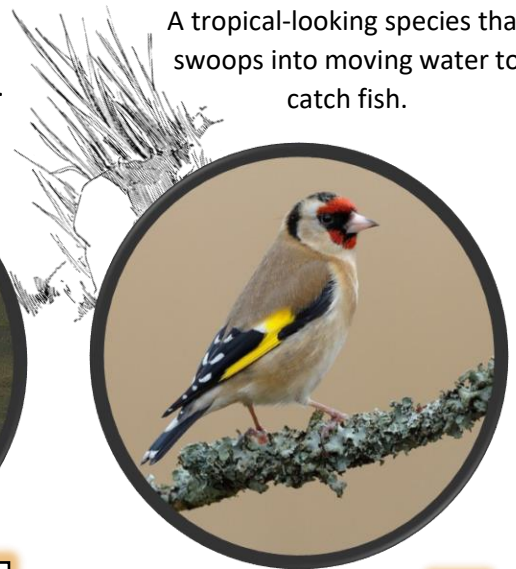

Wigeon

Females have a brown plumage from head to bottom along the belly.

Little Egret

A more recent colonist of the British Isles, with its first appearance back in 1989.

Goldfinch

Travel in social groups which can be easily identified. Long, fine beaks to reach into thistles/teasels.
